## ADD LIFE TO YOUR LIBRARY

CREATE ZONES WITH COCOON

*Create zones and seating areas with this colourful series of furniture*

The initial idea was to create a new set of furniture with several functions that would revolutionize the library. The result is the Cocoon.

The Cocoon furniture series consists of modules in various sizes. The modules can be combined in various ways, so the function of the furniture depends on the combination and the position of the modules - FORM FOLLOWS FUNCTION.

The complete Cocoon module can be positioned either vertically or horizontally.

Vertically, the furniture functions as seating and is available in two different seating heights (one for children and one for adults). It can either be integrated into the shelving system or be a freestanding piece of furniture.

Positioned horizontally, the module is turned into an individual piece of furniture, that can be used for both display and storage as well as small play areas for children.

PEOPLE®

## FORM FOLLOWS FUNCTION

CREATE ZONES WITH COCOON

The individual smaller modules can be used for either seating, a table, a browser or a small shelving.

Position the module horizontally with the curve upwards, and you have a small moveable seat. With the curve downwards, the module can be turned into either a moveable browser or a table. Position the module vertically and you have a small shelving for storage and display.

*The functions have the same design layout, but still offer you the possibility of personalizing the furniture with graphics and colours to fit your library.*

The Cocoon series is made of wood and delivered as standard in white melamine (RAL9016). The interior is available as standard in five different bright and rich colours of 3 mm felt, but is also available in other colours:

Mango - 9400

Red - 9401

Purple - 9402

Green - 9403

Grey - 9404

# CO COON

## MODULES

CREATE YOUR ZONE!

**V** The Vertical Cocoon can be used as both a freestanding piece of furniture, a room divider or as a seat integrated into any shelving system.

**H** Use the horizontal Cocoon to display the newest books or create a hiding place for the younger readers. Both ends have shelves (D25 cm) for storage and display.

**CD** A model similar to the Horizontal Cocoon, this Cocoon is ideal for presenting your CD's and DVD's as well as creating a play area for children.

**S** This seating fits in perfect with the other models of the Cocoon series. Place several seats in a small cluster to create a cozy atmosphere.

**T** A browser for the younger users of the library. The browser is with three compartments and two dividers.

**TI** This table display can be used as a freestanding piece of furniture or in combination with the Cocoon seating, creating a small zone in your library.
